

Internship Testimonial

AICTE Internship Programme 2026

In partnership with
Edunet Foundation × IBM SkillsBuild
Supported by AICTE, Govt. of India

Name:	Aman Raj	Programme:	B.Tech Computer Science (Pre-Final Year)
College:	Ramgarh Engineering College, Jharkhand	Domain:	Healthcare / Agentic AI
Email:	aramanrajaramanraj@gmail.com	Mobile:	+91 9334955453

My Internship Experience

Participating in the Edunet Foundation × IBM SkillsBuild Internship has been a truly transformative experience in my journey as a Computer Science student. Over the course of this programme, I had the opportunity to explore the cutting-edge domain of Agentic AI — a field I had only studied theoretically — and actually build a real-world application from scratch.

Working with IBM watsonx.ai and the IBM Granite 3.2 8B Instruct model through LangFlow gave me hands-on exposure to enterprise-grade AI tools that are actively shaping the future of technology. Building the AI-Powered Nutrition Agent taught me how to design multi-agent workflows, integrate RAG pipelines for accurate knowledge retrieval, and craft intelligent system prompts that drive meaningful, personalised AI behaviour.

What made this internship stand out was how structured yet exploratory it was. The IBM SkillsBuild learning modules laid a strong conceptual foundation, while the project gave me the creative freedom to solve a real societal problem — nutrition inequality in India — using AI. Seeing my agent generate personalised Indian diet plans, calculate BMI, and manage family-level nutrition profiles made the impact feel genuinely meaningful.

I am deeply grateful to Edunet Foundation, AICTE, and IBM for creating this opportunity. This internship has not only strengthened my backend engineering and AI skills, but has also shown me how technology can be applied purposefully to improve lives. I would wholeheartedly recommend this programme to every aspiring engineer who wants to go beyond textbooks and build something that truly matters.
